## Overview

---

The course starts at 9:00 and ends around 18:00. There will be two speakers for Friday morning and two for the afternoon as well. In between, there will be an excursion. The schedule is arranged in order to allow for discussion and exchange. This way the course should be attractive for PhD students, advanced Diploma or Master students, and other interested participants who would like to learn about or broaden their knowledge about mathematical physics and pde.

With the Walkshop 2012 on 26th of October, we continue a tradition of events that took place in Clausthal, Chemnitz, Göttingen and Jena in recent years. The topics typically involve mathematical physics. The distinctive feature of the format is a hike that is supposed to enliven informal discussions between the participants.

## Basic information
